

#	
<b>(A) Technology Transferred to Industry</b>	
1	Phosphoric Acid Production
2	Alkali Activation of Bentonite
3	Water Cooled Panels
4	High Strength Steel
5	FeSiMg Alloy
6	Steel for Bolts and Nuts, Forging and Spiral Springs
7	Enhancing Steel Melting in EAF
8	Foaming Slag During EAF Steel Melting
9	Energy Saving for Production HC – Ferromanganese
10	Higher Quality and Material Saving of FeMn Alloy Production
11	API Steel for Gas Pipelines
12	Ductile Iron Rolls
